

Mécanismes de l'expression de l'information génétique

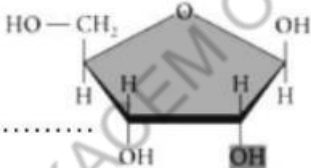

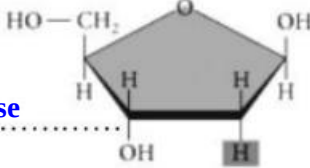

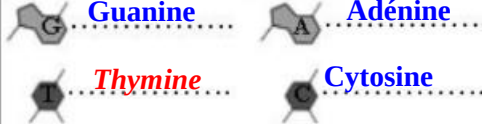

02

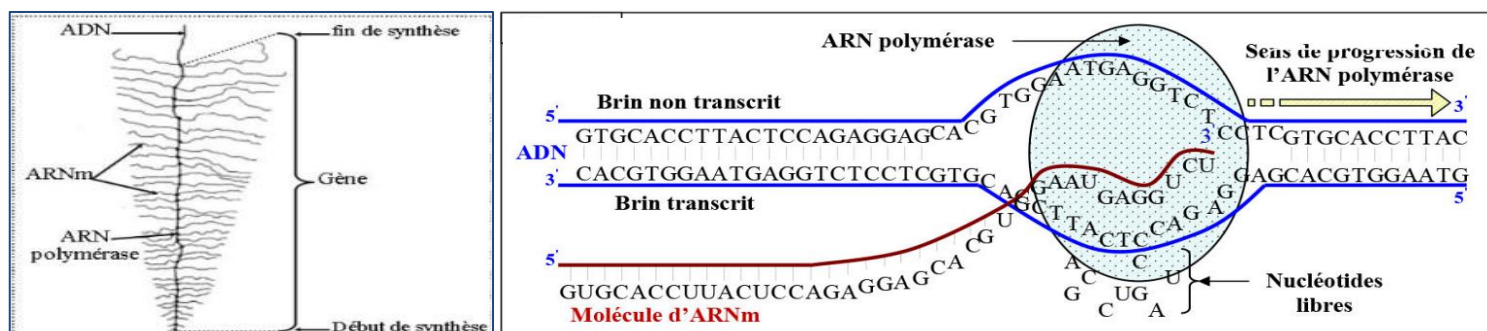

03

- **Sucre ribose**
- **Acide phosphorique**
- **Bases azotées (Adénine- Uracile - Guanine et Cytosine)**

	ARNm	ADN
Sucre	1. Ribose 	2. Désoxyribose 
Bases azotées	Guanine Adénine Uracile Cytosine 	Guanine Adénine Thymine Cytosine 
Structure	3. Simple brin (monocaténaire) 	4. double brin (bicaténaire) 
Localisation	Noyau + cytoplasme	Noyau
